## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 27-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Thompson (6433749).

Regarding Claims 1,27-37, Thompson teaches the basic concept of an antenna arrangement and method of making a car body with integral antennas, and having a number of antennas for different functions and frequencies for a vehicle and arranged in structural cut-outs in at least one of the vehicle skin and in paneling elements which are mounted on the vehicle outer skin in Fig. 1, Figs 2A-C and 4.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2821

4. Claims 2-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thompson.

Regarding Claims 2-26, Thomson teaches various antennas used in the body of the car, including slot antennas. It would have been obvious to the skilled artisan to employ any portion of the car body to mount an antenna, flush with the skin or a thin panel mounted thereon.
